

QUINDOS Offline Programming

This license allows to work off-line with QUINDOS on a second PC.

Programming of parts, statistical evaluations, writing of plot programs etc. on a separate PC without interrupting measurements on the Coordinate Measuring Machine.

Workpieces can be programmed, measurements can be evaluated statistically and plot programs can be written there without interrupting the measuring process on the CMM. Thus, the capacity of a CMM can be improved considerably.

Note: The user needs to have minimum 1 Online license of QUINDOS. The PC is not included in this license.
